

Ecofin Digital Payments Infrastructure Fund (ETPA)

Digital infrastructure is essential to the functioning of the economy. The Ecofin Digital Payments Infrastructure Fund uses a passive management approach and seeks to track the total return performance of the Ecofin Global Digital Payments Infrastructure IndexSM.

About the index

The Ecofin Global Digital Payments Infrastructure IndexSM represents the existing global digital payments landscape. It is a proprietary, rules-based, modified market capitalization-weighted, float-adjusted index comprised of companies that are materially engaged in digital payments, including merchant processing and settlement, real time record keeping, settlement networks, and fintech products/services that facilitate the ease, efficiency and speed of electronic transactions. This includes companies whose primary business is comprised of one or a combination of the following categories: credit card networks, electronic transaction processing and associated products/services, credit card issuers, electronic transaction processing software (payments fintech) or online financial services market places.

ETPA key benefits

- The fund invests in companies that have the potential to benefit as the world continues to evolve from traditional cash payments to the speed, accuracy and efficiency of digital payments
- Access to all participants in the fee-based credit card value chain, including merchant acquirers, processors, networks and issuers
- Exposure to new forms of digital payments, such as mobile, point-of-sale devices and P2P matching engines
- Market cap and liquidity filters that provide a comparatively high level of liquidity

Past performance is no guarantee of future results. Short term performance, in particular, is not a good indication of the fund's future performance, and an investment should not be made based solely on returns. Current performance may be lower or higher than the performance data quoted. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than original cost. Returns less than one year are not annualized. NAV prices are used to calculate market price performance prior to the date when the fund first traded. Market performance is determined using the bid/ask midpoint at 4:00pm Eastern time, when the NAV is typically calculated. Market performance does not represent the returns you would receive if you traded shares at other times. For the fund's most recent month end performance, please call (844) TR-INDEX or (844) 874-6339.

As stated in the Prospectus, the total annual operating expenses are 0.40%. The adviser has agreed to pay all expenses incurred by the fund except for the advisory fee, interest, taxes, brokerage expenses and other fees, charges, taxes, levies or expenses (such as stamp taxes) incurred in connection with the execution of portfolio transactions or in connection with creation and redemption transactions.

Index returns are for illustrative purposes only. Unlike the fund return, index return is pre-expenses and taxes. Index performance returns do not reflect any management fees, transaction costs or expenses.

TIS Advisors is the adviser to the Ecofin Digital Payments Infrastructure Fund and is a registered investment advisor providing research-driven indices that can be used as a realistic basis for exchange-traded products and thought leadership in the universe of essential assets. Its indices are intended to fill a void in the market and provide benchmarks and investable asset class universes for use by investment professionals, research analysts and industry executives to analyze relative performance as well as to provide a basis for passively managed exchange-traded products. Vident Investment Advisory, LLC serves as sub-adviser to the Fund.

The fund's investment objective, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectus contains this and other important information about the fund and may be obtained by calling 844-TR-INDEX (844-874-6339) or visiting www.ecofininvest.com. Read it carefully before investing.

Shares of exchange-traded funds (ETFs) are not individually redeemable and owners of the shares may acquire those shares from the ETF and tender those shares for redemption to the ETF in Creation Units only; see the ETF prospectus for additional information regarding Creation Units. Investors may purchase or sell ETF shares throughout the day through any brokerage account, which will result in typical brokerage commissions.

Investing involves risk. Principal loss is possible. Investing in specific sectors such as digital payments may involve greater risk and volatility than less concentrated investments. Risks include, but are not limited to, risks associated with investing in digital payments industry including major changes in technology, security considerations, taxes, government regulations, economic conditions, competition, political influences, the cyclical nature of the industry, and consumer preferences. Investments in non-U.S. companies (including Canadian issuers) involve risk not ordinarily associated with investments in securities and instruments of U.S. issuers, including risks related to political, social and economic developments abroad, differences between U.S. and foreign regulatory and accounting requirements, tax risk and market practices, as well as fluctuations in foreign currencies. The fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility than larger companies. The fund is not actively managed and therefore the fund generally will not sell a security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the index or the selling of the security is otherwise required upon a rebalancing of the index. There is no guarantee that the fund will achieve a high degree of correlation

to the index and therefore achieve its investment objective. Shares may trade at prices different than net asset value per share.

The MSCI ESG Fund Ratings is designed to assess the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks.

- AAA, AA: Leader- The companies that the fund invests in tend to show strong and/or improving management of financially relevant environmental, social and governance issues. These companies may be more resilient to disruptions arising from ESG events.
- A, BB, BB: Average- The fund invests in companies that tend to show average management of ESG issues, or in a mix of companies with both above-average and below-average ESG risk management.
- B, CCC: Laggard- The fund is exposed to companies that do not demonstrate adequate management of the ESG risks that they face or show worsening management of these issues. These companies may be more vulnerable to disruptions arising from ESG events.

The Fund ESG Rating is calculated as a direct mapping of "Fund ESG Quality Score" to letter rating categories.

- 8.6- 10: AAA
- 7.1- 8.6: AA
- 5.7- 7.1: A
- 4.3- 5.7: BBB
- 2.9- 4.3: BB
- 1.4- 2.9: B
- 0.0- 1.4: CCC

The "Fund ESG Quality Score" assesses the resilience of a fund's aggregate holdings to long term ESG risks. Highly rated funds consist of issuers with leading or improving management of key ESG risks, based on a granular breakdown of each issuer's business: its core product or business segments, the locations of its assets or revenues, and other relevant measures such as outsourced production. The "Fund ESG Quality Score" is provided on a 0-10 score, with 0 and 10 being the respective lowest and highest possible fund scores.

The "Fund ESG Quality Score" is assessed using the underlying holding's "Overall ESG Scores", "Overall ESG Ratings", and "Overall ESG Rating Trends". It is calculated in a series of 3 steps.

Step 1: Calculate the "Fund Weighted Average ESG Score" of the underlying holding's "Overall ESG Scores". The Overall ESG Scores represent either the ESG Ratings Final Industry-Adjusted Score or Government Adjusted ESG Score of the issuer. Methodology for the issuer level scores are available in the MSCI ESG Ratings Methodology document.

Step 2: Calculate adjustment % based on fund exposure to "Fund ESG Laggards ()", "Fund ESG Trend Negative ()", and "Fund ESG Trend Positive (%)".

Step 3: Multiply the "Fund Weighted Average ESG Score" by (1 + Adjustment %).
